COMMON INFORMATION

Researcher and consultant in the area of wireless networks.

Areas of interest: Internet of things, 5G networks, dense deployment, MTC, future Wi-Fi, routing, multiple channel access, multimedia streaming, QoS, mathematical modeling.

Over 50 scientific publications.

Russian Government Prize in Science and Technology for Young Scientists (2016), Huawei Best Cooperation Project Leader (2015 and 2017), Moscow Government Prize for young scientists (2013), Best Paper Award at IEEE ISWCS 2012, Paris, France (among 200 papers).

Contributor and Voting Member of IEEE 802.11 (develops next generation Wi-Fi).

Reviewer of "Communication Letters", "Computer Communications", "Wireless Networks", "Automation and remote control", etc.

Executive Chair of WiFlex 2013, Information technologies and systems (ITaS) Conference & School 2014, 2015 and 2016. Tutorial Chair of IEEE BlackSeaCom'18

Tutorial/Panel speaker at a number of scientific conferences, incl.: IEEE PIRMC 2017, IEEE BlackSeaCom 2017, IEEE ICC 2016, IEEE ISWCS 2014, IEEE ICACCI 2014, etc.

Experience in applying and leading research grants and industry projects. Leader of projects funded by Huawei, Quantenna Communications, Russian Science Foundation, Russian Foundation for Basic Research, Ministry of Education and Science, British Council, etc.

Science promotion in mass media: TV Culture, PostNauka, Radio Silver Rain, Habrahabr, etc.

WORK EXPERIENCE

Head of Telecommunication Networks Lab (early positions: Junior Researcher, Researcher, Senior Researcher)

2008 – present time

*Institute for Information Transmission Problems (Kharkevich Institute),
Russian Academy of Sciences*

Has developed mathematical and simulation models of various networking protocols for wireless networks (both cellular and WLANs), found drawbacks and improved their efficiency (Russian Government Prize in Science and Technology for Young Scientists, 2016).

Has developed pioneering approaches to model IEEE 802.11ah aka Wi-Fi HaLow (for IoT).

Has designed methods improving QoE in cellular (Huawei Best Cooperation Project Leader).

Has introduced and studied a new type of queuing systems to model multimedia streaming via periodic reservations (Moscow Government Prize for young scientists).

Has developed a theory of link management in multihop ad hoc networks (Best Paper Award).

Has designed and studied performance of the Scalable MESH and Proximity Based Groupcast in MANET routing protocols for QoS sensitive multimedia streaming.

Together with Prof. Ian F. Akyildiz prepared a project proposal and won a Megagrant.

Being an Executive Co-chair of ITaS 2015, he has extended program committee and increased the conference audience and the number of talks (both keynotes and regular) by 50...100%.

Head of Telecommunication Systems Lab

2017 – present time

Higher School of Economics

Has established a lab, designed a research program, and prepared project proposals.

Deputy Head of Department & Associate Professor 2012 – present time
(early position: Assistant Professor)

Moscow Institute of Physics and Technology.

Has significantly improved curriculum in *telecommunications*. Developed novel courses.

Lectures on 4 courses, supervises BS and MS students. Supervises 4 PhD students. 2 supervised students (Alexey Kureev and Vyacheslav Loginov) won the first and the second prizes at the Student Olympiad "Infotelecom" in 2016 and 2015.

Associate Professor 2017 – present time

Moscow State University

Lectures on *Mathematical fundamentals of wireless networks protocols*

Deputy Head of Lab (early position: Senior Research Scientist) 2016 – 2017

Skolkovo Institute of Science and Technology

Center for Computational and Data-Intensive Science and Engineering

Has designed an MS educational program on the Internet of Things (joint program with SUAI).

Has designed two courses on the Industrial Internet of Things and Telecommunication Technologies for the Internet of things.

Visiting Research Fellow July 2015 – October 2015

King's College London, Department of Mathematics and Natural Science

Has developed a method for performance evaluation of Wi-Fi networks in IoT scenarios.

Developer, Team Leader 2007 – 2008

NetCracker

Has created 2 modules for NetCracker OSS. Has implemented Netcracker OSS in MTS, Sprint.

Tutor 2007 – 2008

Moscow Institute of Physics and Technology

Kalashnikov Centre for Research and Innovation in Telecommunication

Has lectured on *Java Advance*. Was responsible for preparing learning material for courses and devising relevant practical activities.

EDUCATION

PhD Student 2010 – 2012

*Moscow Institute of Physics and Technology &
Institute for Information Transmission Problems*

Doctor of Philosophy. Thesis: *Performance evaluation of data transmission methods, which meet QoS requirements in wireless ad hoc networks*. Early defense at the second year.

Specialization: *Telecommunication Systems and Network*.

Master Student 2008 – 2010

Moscow Institute of Physics and Technology

MS in Applied Physics and Mathematics. Graduated with honors. GPA 5.00 out of 5.00.

Thesis: *Multiple metrics usage in mesh networking*.

Bachelor Student 2004 – 2008

Moscow Institute of Physics and Technology

BS in Applied Physics and Mathematics. Graduated with honors. GPA 4.93 out of 5.00.

Thesis: *Channel Switch Time Distribution in ECMA-368 Networks*.

SKILLS

Advance PC User: Windows, Linux (Ubuntu); LaTeX, R, Matlab, GPSS, ns-3, etc.

Programming Languages: Java (SE, ME, EE), C++, SQL, JavaScript, XML, Html.

Languages: English, Russian, Romanian.

INVITED TALKS, KEYNOTES & TUTORIALS, RADIO&TV

- T1. Future Wi-fi (Tutorial). IEEE International Symposium on Personal, Indoor and Mobile Radio Communications, Montreal, Canada, 2017
 - T2. Wi-Fi for 5G: Faster and Smarter (Tutorial). IEEE BlackSeaCom, Istanbul, Turkey, 2017
 - T3. IEEE 802.11 in a 5G Landscape. Industrial panel at IEEE International Conference on Communications 2016. Kuala Lumpur, Malaysia, 2016.
 - T4. Low Power Wi-Fi – How IEEE 802.11ah is transforming M2M (Tutorial, 2h). IEEE International Symposium on Wireless Communication Systems, Barcelona, Spain, August 2014.
 - T5. IEEE 802.11ah, an Enabling Technology for the Internet of Things. How Does it Work? (Tutorial, 3.5h). IEEE International Conference on Advances in Computing, Communications and Informatics. Delhi, India, September 2014.
 - T6. Are you ready for the ICT revolution? (Keynote) The LVI Conference of Moscow Institute of Physics and Technology, Dolgoprudny, Russia, November 2013.
 - T7. Internet of Things. Black Holes. Blanc Spots. TV Culture, Moscow, Russia, 2016.
 - T8. Future Internet. Black Holes. Blanc Spots. TV Culture, Moscow, Russia, 2016.
 - T9. Open Lectures: Future Internet. Radio "Silver Rain". Moscow, Russia, September 2015.
 - T10. Standards of Wireless Networks. Postnauka. Moscow, Russia. April 2015.
